

THE CORPORATION OF THE DISTRICT OF SAANICH

BYLAW NO. 8789

TO REGULATE SIGNS

The Municipal Council of The Corporation of the District of Saanich in open meeting assembled enacts as follows:

1. DEFINITIONS:

In this Bylaw:

ALTERATION means a modification of a sign including a change to the copy or lettering, but does not include routine maintenance or repairs.

ANIMATED SIGN means a sign which uses change of lighting to depict action or create special effects or a pictorial scene, but does not include a time and/or temperature digital sign.

BUILDING FACE means a side of a building facing a street or facing the customer parking and access areas on the building parcel.

BUSINESS means a commercial or industrial undertaking of any kind or nature including the providing of professional, personal, or other services for the purpose of profit or gain.

BUSINESS SIGN means a sign used for identification purposes, which directs attention to a business or activity conducted upon the premises at which the sign is located.

CANOPY means a fixed nonretractable structure projecting from the face of a building including the marquee for protecting the public from inclement weather. The canopy does not include a projecting roof or normal architectural features such as links, sills, mouldings, and pediments.

CANOPY SIGN means a business sign attached to or forming part of a canopy but does not include a marquee or roof sign.

CHANGEABLE COPY means copy which can be manually or electronically changed.

CLEARANCE means the shortest vertical distance between the underside of a sign and finished grade.

COMPREHENSIVE SIGN PLAN means a plan which indicates the location, type, dimension, and illumination of all external signs to be included as part of development proposals in Sign Districts C and D.

COPY AREA - FREESTANDING SIGNS means only the portion of a sign devoted to advertising and excludes all framing, trim, moulding, or supporting structures.

COPY AREA - SIGNS PERMITTED OTHER THAN FREE STANDING SIGNS means the entire face of a sign including the advertising surface and any framing, trim or moulding but not including the supporting structures.

CORPORATION means The Corporation of the District of Saanich.

COUNCIL means the Municipal Council of The Corporation of the District of Saanich.

DIRECTIONAL SIGN means a sign which only indicates points of entry and exit to a property, or incorporates a building or floor plan, or indicates site circulation within the property.

EAVE means the projecting lower edge of a roof overhanging the wall of a building.

FASCIA SIGN means any business sign which does not project more than 30 cm (12 inches) from the face or wall of a building or structure to which it is attached, and does not extend above the eaves, parapet, or roof edge.

FINISHED GRADE means the final elevation of the ground surface after development.

FREESTANDING SIGN means any business sign which is self supported or supported by a structure which is independent of any building or other structure.

FULLY SHIELDED means outdoor light fixtures shielded or constructed so that light rays emitted by the fixture are projected below the horizontal plane passing through the lowest point on the fixture from which the light is emitted.

GROSS FLOOR AREA means the sum of the horizontal floor areas of a building or structure measured from the exterior face of exterior walls.

INDIRECTLY ILLUMINATED SIGN means a sign illuminated with a light so shielded that no direct illumination from it is visible elsewhere than on the sign and in the immediate proximity thereof.

INSTITUTION means a building in which a public, quasi-public or non-profit use is carried on.

LOT means a lot, strata lot, parcel, block or other area in which land is held or into which land is subdivided.

MANAGER OF COMMUNITY PLANNING means the Manager of Community Planning of The Corporation of the District of Saanich and includes those officials of The Corporation performing their duties under his/her authority and control.

MARQUEE SIGN means any business sign affixed wholly beneath a canopy at right angles to a building.

MUNICIPALITY means The Corporation of the District of Saanich.

PARAPET means an extension of the main walls of a building above the roof level.

PARTIALLY SHIELDED means shielding so that the lower edge of the shield is at or below the centre line of the light source or lamp so as to minimize the light transmission above the horizontal plane so that ninety percent (90%) of the emitted light projects below the horizontal plane as is evidenced by the manufacturer's photometric data.

PROJECTING SIGN means any sign which projects more than 30 cm (12 inches) from the face or wall of any building to which it is attached.

PORTABLE SIGN means a sign designed to be moved from place to place without involving any structural or support changes; included in this category are vehicles whose primary function is advertising.

ROOF SIGN means any sign erected upon or above a roof or parapet of any building.

ROTATING SIGN means any sign which moves in a revolving or similar manner.

SIGN means any identification, illustration, fixture, or device which is visible to a public street and is intended for advertising or calling attention to any person, matter, object, or event.

SIGN AREA - FREESTANDING SIGN means the entire face of a sign including any copy area framing, trim, molding, or supporting structure.

SIGN AREA - SIGN PERMITTED OTHER THAN FREESTANDING SIGNS means copy area for signs permitted other than freestanding signs.

SIGN DISTRICT means a sign district established under this Bylaw.

SITE SIGN means an unlighted sign limited to displaying the name and address of a residence, institution, or business.

SPECIAL OCCASION SIGN means a sign containing words, pictures or graphics referring to a special occasion of a person including but not limited to a birthday, marriage or anniversary.

STREET means a street, highway, road, lane, bridge, viaduct, and any other way open to public use, but does not include a private right-of-way on private property.

TEMPORARY SIGN means a sign advertising the construction, lease, subdivision, design, or sale of the property at which the sign is located.

THIRD PARTY ADVERTISING means content on a sign which directs attention to products sold or services provided which cannot be considered as the principal product sold or principal service provided on the premises at which the sign is located.

THIRD PARTY SIGNS means a sign which directs attention to a business, commodity, service, or entertainment conducted, sold or offered at a location other than the lot on which the sign is located. Excluded from this category shall be bus shelters on which advertising may be permitted under a signed agreement with the Municipality.

TIME AND TEMPERATURE DIGITAL SIGN means a sign in which the time, temperature, or time and temperature are displayed by artificially illuminated digits.

TRAFFIC CONTROL DEVICE means a sign, stop sign, signal, line, parking space, barrier, traffic control signal, traffic control flashing signal or device placed or erected under the

provisions of the *Motor Vehicle Act* or the Streets and Traffic Regulation Bylaw of The Corporation for the purpose of regulating and controlling street traffic.

UNSHIELDED means light fixtures lacking any means to restrict the emitted light below the horizontal plane.

WALL SIGNS means any business sign painted directly upon a wall or other part of any building or structure.

WINDOW SIGN means any sign fixed to the interior of a window and visible from a street.

ZONE means a zone district established under “Zoning Bylaw, 2003, No. 8200”, and amendments thereto, or in the case it is repealed, its successor bylaw.

2. **SIGNS NOT PERMITTED**

(d) Temporary Sign:

- i) A Temporary Sign shall be unlit.
- ii) The copy area shall not exceed 5.5 m² (59.2 ft²) or have any single dimension that exceeds 3 m (9.8 ft.).
- iii) No sign shall be located less than 3 m (9.8 ft.) from any lot line.
- iv) The display of such a sign shall be limited to a six month period at the expiration of which the permittee shall remove the sign.

(e) Sign Containing Changeable Copy:

- i) The copy area of a freestanding sign containing changeable copy shall not exceed 2 m² (21.5 ft²) if one-sided or 4 m² (43.1 ft²) if multi-sided, 100% of which may be changeable copy.
- ii) No freestanding sign containing changeable copy shall exceed a height of 4.25 m (13.9 ft.) from the finished grade.
- iii) No freestanding sign containing changeable copy shall be located within 3 m (9.8 ft.) of interior side lot lines.
- iv) The copy area of a fascia sign containing changeable copy shall not exceed 2 m² (21.5 ft²), 100% of which may be changeable copy.

(f) Special Occasion Sign:

- i) The copy area shall not exceed .74 m² (8 ft²).
- ii) No Special Occasion Sign shall remain posted on a lot for more than 24 hours.

15. RULES ENFORCEMENT APPLICABLE TO ALL SIGNS

- (a) Notwithstanding anything in this Bylaw, no sign shall be constructed or placed in a position which is likely to block, obstruct or interfere with a motorist's view of other traffic, pedestrians, or traffic control devices.
- (b) No person shall construct or place a sign on or over any real property owned by the Municipality or a street unless the approval of the Director of Engineering is first obtained.
- (c) No person shall stop, stand, or park a vehicle on any real property for the principal purpose of displaying signs, and no person shall suffer any such vehicle to remain on the lands of which he/she is the owner or occupier.

16. NONCONFORMING SIGNS

- (a) A sign which was erected before the coming into force of this Bylaw shall not be altered, rebuilt, or relocated without conforming to the requirements of this Bylaw.
- (b) Notwithstanding Subsection (a), a sign located on a property in Sign District A on which there is a Legal Nonconforming Use, may be altered, repaired or replaced provided that the new, altered or repaired sign shall comply in all respects with the size, shape, type and siting regulations of Section 9 of this Bylaw.

17. STRUCTURAL STANDARDS

Notwithstanding any other provisions of this Bylaw, whenever in the opinion of the Manager of Community Planning, the proposed work requires special technical knowledge, it may be required as a condition of the issuance of any permit that all drawings, specifications and plot plans, or any part thereof, be prepared and signed by and the construction carried out under the supervision of an architect or professional engineer.

18. INSPECTION

The Manager of Community Planning may enter at all reasonable times any land or premises in order to ascertain whether or not the provisions of this Bylaw are being observed and no person shall obstruct, or attempt to obstruct, his/her entrance into any premises while he/she is carrying out his/her duties hereunder.

19. REMOVAL AND IMPOUNDMENT

- (a) The Manager of Community Planning may order the removal of any sign erected in contravention of this Bylaw or may order the upgrading of any sign considered in hazardous condition.
- (b) The Manager of Community Planning and any Bylaw Enforcement Officer may remove and impound any sign found in contravention of Section 14 (b) of this Bylaw.
- (c) Any sign impounded under Subsection (b) of this Section may be reclaimed by its owner upon payment to the Municipality of a storage and handling fee of \$25.
- (d) The Manager of Community Planning may destroy or dispose of any impounded sign which has not been reclaimed within five days of its impoundment.

20. INTERPRETATION

In case of conflict between a metric unit of measurement and its imperial equivalent, the metric unit shall take precedence.

21. PENALTIES

Every person who, without lawful excuse, contravenes this Bylaw by willfully doing any act which it forbids, or omitting to do any act which it requires to be done, is guilty of an offence and is liable on summary conviction, to a fine of not less than \$100 and not more than \$300 for a first offence, and for each subsequent offence to a fine of not less than \$200 and not more than \$1,000. A separate offence shall be deemed to be committed upon each day during and in which the contravention occurs or continues. The penalties imposed under this Section shall be in addition to and not in substitution for any other penalties or remedy imposed by this Bylaw.

22. Bylaw No. 8101 being the “Sign Bylaw, 2000”, and amendments thereto are hereby repealed except insofar as they may repeal any other bylaw.

23. This Bylaw may be cited for all purposes as the “**SIGN BYLAW, 2006, NO. 8789**”.

Includes Bylaw Amendment No. 8854

THE CORPORATION OF THE DISTRICT OF SAANICH

**MUNICIPAL OUTDOOR LIGHTING STANDARDS
FOR THE CONTROL OF LIGHT POLLUTION**

**SCHEDULE "A"
to Sign Bylaw No. 8789**

**MUNICIPAL OUTDOOR LIGHTING STANDARDS
FOR THE CONTROL OF LIGHT POLLUTION****SCHEDULE "A"****TERMINOLOGY**

For purposes of these standards the following terminology applies:

Outdoor Light Fixtures - means outdoor artificial illuminating devices, installed or portable, used for flood lighting, general illumination or advertisement. Such devices shall include, but are not limited to, search, spot, flood, and area lighting for:

- a) buildings and structures
- b) recreational facilities
- c) parking areas
- d) landscape illumination
- e) outdoor advertising displays, signs
- f) public and private streets, and
- g) walkways

Fully Shielded - means outdoor light fixtures shielded or constructed so that light rays emitted by the fixture are projected below the horizontal plane passing through the lowest point on the fixture from which light is emitted.

Partially Shielded - means shielding so that the lower edge of the shield is at or below the centre line of the light source or lamp so as to minimize the light transmission above the horizontal plane, or at least ninety percent (90%) of the emitted light projects below the horizontal plane as evidenced by the manufacturer's photometric data.

Unshielded - means fixtures lacking any means to restrict the emitted light to below the horizontal plane.

Average Maintained Horizontal/Vertical Illuminance - means a standard of measurement employed by the Illuminating Engineering Society of North America to calculate the average density of luminous flux incident on a surface when measured at different locations on the surface affected by the lamp.

APPLICATION

1. These standards apply to all developments other than single family, duplex and agricultural uses in rural zones.
2. All plans for building and/or Development Permits noted in Section 1 submitted to the Municipality for projects located within 5 km of the Dominion Astrophysical Observatory shall include the following:

- a) Location and type of all exterior lights including internally or externally illuminated signs.
- b) Catalogue descriptions and specifications of lights to be used including lamp types and tables or large scale plots showing the photometric distributions from the nadir to the zenith in the vertical plane.
- c) Tables or plots of the calculated horizontal illumination levels on the illuminated portion of the applicant's property or the calculated mean horizontal illuminance for the illuminated portion of the property.
- d) Tables or plots of the calculated vertical illumination levels on the specially illuminated walls or the calculated mean vertical illuminance for these walls.
- e) Descriptions or provisions, if any, to reduce the illumination from "operational" to "security" levels after 2300 hours or the close of business, whichever is later. This does not apply to residential developments.
- f) Certification that the building does not contain any architectural features, eg. skylights that will allow an unusual amount of light to escape to the sky from the interior of the building, or, description of the steps that have been taken to prevent light escaping directly ie;, without reflection, to the sky through such architectural features.
- g) Applicants to provide information indicating the lighting plan has been considered and approved by the Dominion Astrophysical Observatory.

Note: The foregoing information is not necessary for projects that are located outside of the 5 km radius of the Dominion Astrophysical Observatory, however, all outdoor lighting fixtures shall comply with the shielding requirements contained in Section II and Table "A" of these standards.

LIGHTING STANDARDS

I Wavelength Distribution of Radiant Energy

1. Except as noted in Sections I (2) and I (3), the wavelength distribution of light emitted by all outdoor light fixtures shall minimize interference with the Dominion Astrophysical Observatory and comply with the specifications contained in Note #1. The effect of this regulation is to prohibit the use of luminaires which emit excessive blue light and/or red light with emission lines.

Note #1:

- a) less than 5 percent of the total emergent flux between the wavelengths of 330 and 950 nanometres (nm) shall be at wavelengths less than 440 nm.

- b) less than 20 percent of the total emergent flux between the wavelengths of 330 and 950 nm shall be at wavelengths less than 540 nm.
 - c) less than 15 percent of the total emergent flux between 330 and 950 nm shall be at wavelengths greater than 640 nm, except that no restrictions shall apply to this range if the radiant energy distribution of the lamp is a smooth continuum without emission lines anywhere in the wave length range 330 - 950 nm.
2. The use of Metal Halide, Mercury Vapour, and Quartz outdoor lighting is prohibited within 5 km of the Dominion Astrophysical Observatory except as provided in Sections I (3) and I (4).
 3. The restrictions in this section, except for the prohibition of Metal Halide lights, shall not apply to lights that illuminate areas used for the outdoor display of merchandise for sale and public and private outdoor recreation areas.

It is recommended that lighting used for such purposes be turned down to "Security Levels" after 2300 hours unless the irregular schedule of the business or facility makes this impractical.

4. All outdoor lighting for advertising signs shall comply with the Municipal "Sign Bylaw, 2006, No. 8789" and amendments thereto or any successor bylaw.

II Shielding

1. Except as provided in Section II (2) all outdoor light fixtures shall be shielded in accordance with the requirements set out in Table A.
2. Advertising and identification signs consisting of glass tubes filled with neon, argon, and/or krypton or constructed of translucent materials and wholly illuminated from within do not require shielding.

III Illumination Levels

1. The average maintained horizontal illuminance shall not exceed 1.5 foot candles (16.5 lux) except as noted in Section III (3).
2. The average maintained illuminance shall be reduced to approximately 0.5 foot candles (5 lux) between 2300 hours, or the closure of the facility to the public, whichever is later, and sunrise. This shall be accomplished by automatic timing devices except in those cases where an irregular schedule of the facility or business makes this impractical.

Note: Timing provisions ensure that security light levels will be kept to the minimum level throughout the night. Automatic methods are preferred to manual methods as experience shows that manual methods do not

always work due to the human factor - forgetfulness, poor communication between management and staff.

3. Illumination levels for areas used for the outdoor display of materials for sale shall not exceed the following levels.
 - a) The average maintained horizontal illuminance shall not exceed 20 foot candles (215 lux).
 - b) The average maintained horizontal illuminance in a display area shall be reduced to 1.5 foot candles (16.5 lux) between 2300 hours or the closure of business, whichever is later, and sunrise.
4. The average maintained vertical illuminance of vertical surfaces illuminated for architectural decorative purposes shall not exceed 6 foot candles (65 lux).

Note: Higher illumination levels are allowed than for area lighting because most of the light will have to be reflected twice before it is directed upwards (assume lights facing downwards on a wall surface for example).

IV Mounting Height

1. The mounting height of exterior light fixtures shall not exceed the elevation of 229 metres geodetic datum which is the elevation of the bottom of the slit in the observatory dome of the Dominion Astrophysical Observatory.

V Hours of Operation of Advertising and Decorative Lighting

1. All architectural or decorative lighting shall be turned off between 2300 hours or the closure of the business or facility of the public, whichever is later, and sunrise. This shall be accomplished by automatic timing devices unless the irregular schedule of the business or facility makes this impractical.

VI Skylights

1. Skylights and all windows or surfaces that are at an oblique angle to the vertical shall use tinted glass such that no more than 20 percent of the incident light will pass from the interior to the exterior of the building and no interior light shall be directly visible from the exterior of the building through the skylight.

TABLE "A"
SHIELDING REQUIREMENTS

	Within 5 km radius of D.A.O. *	Outside 5 km radius of D.A.O.
FIXTURE LAMP TYPE	SHIELDED	SHIELDED
Low Pressure Sodium ¹	Partially	Partially
High Pressure Sodium	Fully	Fully
Metal Halide	Prohibited	Fully ^(2.4)
Mercury Vapor	Prohibited	Prohibited
Fluorescent	Fully ^(3.5)	Fully ^(3.5)
Quartz ⁽⁶⁾	Prohibited	Fully
Incandescent - Greater than 160W	Fully	Fully
Incandescent - 160W or less	None	None
Any Light Source of 50W or less	None	None
Glass Tubes filled with Neon, Argon, Krypton	None	None

* DOMINION ASTROPHYSICAL OBSERVATORY

NOTES:

1. This is the preferred light source to minimize undesirable light emission into the night sky affecting astronomical observations.
2. Metal Halide lighting used primarily for display purposes shall not be used for security lighting after 2300 hours. Metal Halide lights shall be installed only in enclosed luminaries.
3. Outdoor advertising signs of the type constructed of translucent materials and wholly illuminated from within do not require shielding. Dark backgrounds with

light lettering or symbols are preferred, to minimize detrimental effects. Unless conforming to the dark background preference, total lamp wattage per property shall be less than 41 watts within 5 km of the observatory.

4. Warm white and natural lamps are preferred to minimize detrimental effects.
5. Metal Halide light fixtures shall include a glass, acrylic, or translucent enclosure of the light source (quartz glass does not meet this requirement).
6. Quartz lamps shall not be considered an incandescent light source.
